ANNUAL REPORT

OF THE

STATE AUDITOR

FOR THE

FISCAL YEAR ENDING NOVEMBER 30, 1892.

STATE OF NORTH CAROLINA,
AUDITOR'S DEPARTMENT,
Raleigh, N. C., January 2, 1893.

To His Excellency THOMAS M. HOLT,
Governor of North Carolina.

SIR:—I have the honor to transmit herewith the annual report of this Department for the fiscal year ending November 30, 1892, with sundry statements concerning matters of public interest.

I have divided this report into two parts, Nos. 1 and 2, (only one volume). No. 1 relates entirely to the financial affairs of the State, and No. 2 to statistical matters and tabulated statements. This is done with a view to ready reference and system.

The General Statement on page 2 shows a balance in the hands of the State Treasurer, after accounting for outstanding accounts and warrants remaining uncollected at the close of the year, to be, of the Public Fund $310,391.17, and of the Educational Fund $28,568.83, against $151,138.67 and $10,601.03, respectively, for the previous year.

Reference to Statement C will show a decrease in the receipts of the Educational Fund, as well as a corresponding decrease in the disbursements of said fund.

Statement F, on page 3, shows an increase of the receipts of the Public Fund of $27,068.91, and a decrease in the disbursements of said fund of $92,805.51, compared with the previous year.

Reference to Statement 7, page 109, shows a considerable increase in the assessed value of railroad property, as reported by the Railroad Commission, and consequently an increase in taxes resulting therefrom.

As indicated in my last report, I suggest here that the proviso under Section 46, Machinery Act, 1891, shall be so amended as that the property outside of the right-of-way shall be listed with list-takers as any other property, and shall not be returned to State officers as other railroad property.

I call special attention to Statement 2, page 98.

I again call attention to Addenda, on page 110, and repeat what I had to say concerning it in my last report, namely, that this statement is of special interest —

1. Because the aggregate amount of property listed by white and colored citizens is for the first time reported separately.

2. The amount of bank stock listed in each county is reported.

3. The amount of railroad property in each county is shown; and,

4. The aggregate of all these separate properties, not heretofore anywhere completely tabulated, gives the true total valuation in each county of all property in that county, and thus, and only thus, the true aggregate value of all property listed for taxation in the State, which is $262,796,816, that being $52,761,363 more than was reported under the assessment of 1887; but in this amount is included railroad property and bank stock amounting to $20,669,802, which, being deducted, will show a net increase in the taxable value of property over the assessment of 1887 amounting to $32,091.561.

The assessment here referred to is made only every four years, and as the one for 1891 was made after the adjourn-

ment of the Legislature, which convened that year, I think it best to repeat special mention of the same for the interest and guidance of the Legislature of 1893, which is about to convene.

PENSIONS.

The Legislature of 1889, the first to convene after my induction into office as Auditor, passed a new pension law which superseded the Act of 1885 as amended by Laws of 1887. The new act required a re-enrollment of all the old pensioners, and provided for a division of them into classes, according to the nature and extent of the disability each soldier had sustained from wounds received. The widows of soldiers who died in the war were specifically assigned to the Fourth Class. See section 1, chapter 198, Laws of 1889. This Act of the Legislature of 1889 requiring re-enrollment, classification, etc., demanded a discriminating judgment and very heavy labor on the part of the Auditor. I had to create largely a new literature for the Department, while the entering of the names of nearly five thousand pensioners, distributed among the ninety-six counties of the State, and the assignment of these to their proper classes, according to the provisions of the Act, was anything but an easy task. This has all been done, however, and the Pension Division of the Auditor's Department is now in such shape and condition as to make the execution of the pension law a simple and an easy matter for the future. Some attention needs to be given from time to time to revising the pension roll of each and all the counties, as, despite the best endeavor, both of the Auditor and the State Board of Pensions, unworthy persons will now and then, by misrepresentation or in other way, secure admission to the roll. Attention also should be given to determining the correctness of the classification of pensioners on the roll of each county, as, owing to vagueness of description and statement in physician's certificates, pensioners will sometimes be wrongly classified. This need not be the case if

applicants for pension, and physicians giving certificates, and the County and Advisory Pension Boards will all remember that section 1 of the Pension Act makes the requirements for admission to Classes 2 and 3 very clear, and limits such admission positively to such pensioners as have sustained injuries of a definitely described sort, and leaves no room for admission upon the basis of injuries of a sort that are "equivalent." The only question open, then, at any time as to classification of pensioners who are not entitled to admission to Classes 2 and 3, is as to whether they are *totally disabled and helpless*, and so to be assigned to the First Class, or whether their wounds are not so serious, and they are therefore to be assigned to the Fourth Class. Strict attention to this on the part of applicants in presenting their claims, and of physicians, pension boards, &c., in passing upon them, will not only save the Auditor and State Board of Pensions much trouble, but will also bring about such a proper classification, and thus such justice to each class, as the pension law intends to establish and promote. In saying this, I speak of course with reference to the execution of the pension law as it at present exists, without passing upon the merits of the law as it relates to classification or of the classifications themselves. It seems to me a matter for regret that by the terms of the law so many worthy old soldiers are kept off of the pension roll who ought to be on, and that so many on the roll who are painfully, and even seriously wounded, receive so small a pension on account of the inflexibility of the law and its classifications. At the same time I must renew the recommendation I have made in previous reports against all special legislation for the benefit of individuals (except in the most extreme cases) as being likely to prove partial, unjust and giving cause for general dissatisfaction and complaint on the part of the great body of pensioners and their friends.

The number of pensioners on the State Pension Roll is as follows: First Class, 51; these receive this year each $68,

as against $60 last year. Second Class, 236; these receive each $51, as against $45 last year. Third Class, 367; these receive each $34, as against $30 last year. Fourth Class (soldiers), 1,239; these receive each $17, as against $15 last year. Fourth Class (widows), 2,818; these receive each $17, as against $15 last year.

The increase or decrease of pensioners in the First Class during the year is none; in the Second Class the decrease is 13; in the Third Class the increase is 10; in the Fourth Class soldiers) the increase is 109; in the Fourth Class (widows) the increase is 20; showing a net increase of 126, and leaving total on roll January 1, 1893, soldiers and widows, 4,711.

The total amount paid out this year for pensions is in round numbers $97,000, which is an increase over last year of about $10,000. This increase comes mainly from an increase of railroad property listed for taxation during the year.

In closing my term of four years in this office, I desire to make mention of the capability of Mr. J. D. Boushall for the position of Chief Clerk, which he has been holding until a few months since. Mr. W. S. Stallings, Pension Clerk, has also discharged the duties of his position faithfully and well. Mr. T. P. Jerman, Jr., who entered upon the duties of Chief Clerk upon the resignation of Mr. Boushall, has proved himself apt and capable in mastering and meeting the requirements of his position, and has likewise been very helpful to me. To all of these gentlemen I tender my sincere thanks.

I have the honor to be

Your Excellency's most obedient servant,

G. W. SANDERLIN,

State Auditor.

ANNUAL REPORT

OF THE

STATE AUDITOR

FOR THE

FISCAL YEAR ENDING NOVEMBER 30, 1893.

STATE OF NORTH CAROLINA,

AUDITOR'S DEPARTMENT,

RALEIGH, January 1, 1894.

To His Excellency, ELIAS CARR,
Governor of North Carolina,

SIR:—I have the honor to submit herewith the annual report of this Department for the fiscal year ending November 30, 1893.

The index of contents will indicate the statements and tables contained in this report, and the subject-matter of each. These statements and tables are of special interest, and merit the careful attention and consideration of the people.

I do not here refer in detail to all the statements or tables, nor do I use the fractions of dollars in commenting upon those referred to, but rather round figures. The tables will fully verify those used in comments which follow. I have deemed it well to institute some comparisons, and comments thereon, trusting that such may be useful to those directly concerned—the tax-payers.

PENSIONS.

There have been issued on account of pensions, under the various laws, warrants as follows:

Under sections 3477–3478 of The Code, 38 in number, amounting to	$ 4,560 00
Under Laws of 1889, as amended by Acts of 1891 and 1893, to first class, 68 in number, amounting to	4,352 00
To second class, 252 in number, amounting to	12,096 00
To third class, 364 in number, amounting to	11,648 00
To fourth class, widows, 2,804 in number, amounting to	44,864 00
To fourth class, soldiers, 1,360 in number, amounting to	21,760 00
Total amount	$99,280 00
Total number on roll on 1st January, 1894	4,886

An increase over 1892 of 139, distributed as follows:

In class provided for by sections 3477–3478 of The Code		2
In first class, Laws 1889, etc.		17
In second class, Laws 1889, etc.		16
In fourth class, Laws 1889, etc.		121
Total increase		156
Decrease from last report in third class, Laws of 1889, etc.	3	
In fourth class, widows, Laws of 1889, etc.	14	
Total decrease	17	17
Net increase for the year		139

BUILDING AND LOAN ASSOCIATIONS.

The General Assembly at its late session amended Chapter 7, Volume II, of The Code, entitled "Building and Loan Associations," requiring non-resident companies doing or proposing to do business in this State to appoint a resident agent or attorney; all companies doing business in this State to file annually with the Auditor a "statement of the business standing and financial condition of the applicant on the preceding 31st day of December," with other precautionary requirements (Ch. 434, Laws of 1893).

Statement No. 8 of this report gives the companies which have complied with this law.

The business of such associations is rapidly growing in this State. It is not an unhealthy sign that such is the case. When honestly managed it is one of the most useful agencies for the encouragement of economy and the securing of homes by wage-earners and those of limited incomes that has ever been devised, as long experience in other sections has proven. To encourage the people to own their homes is one of the first duties of the State, as thus fixing their interest necessarily enhances their love of State and makes them better citizens. Such agencies, therefore, should be encouraged by the State by just laws, but with rigid regulations, required alike for the protection of honest associations and of the people who patronize them. The Act of the last Assembly had the effect to retire from the State a number of companies, a very large majority of which, I am sure, were fraudulent concerns. In this respect at least our people have been largely benefited by the recent legislation. Other legislation, as to some details of administration, is necessary, which will be suggested in the next annual report.

PROPERTY VALUES, TAXATION AND EXPENDITURES.

This report, covering the tax year 1892, shows a considerable decrease in the property values of the State, outside of town and railroad properties, compared with 1891. It is but just that I point out the subjects of decrease as well as the amount of the decrease of each:

On land (outside of towns), decrease	$ 852,174 00
On horses, decrease	350,582 00
On mules, decrease	361,434 00
On cattle, decrease	265,140 00
On hogs, decrease	198,891 00
On sheep, decrease	38,265 00
On goats, decrease	3,618 00

On jacks and jennies, decrease	$ 4,091 00
Money on hand or deposit, decrease	1,463,505 00
Solvent credits, decrease	966,505 00
On farming utensils and all personal property, decrease	2,272,548 00
Total decrease	$ 6,776,753 00

The increase of values is as follows:

On town property (real)	$ 856,240 00
Stock in incorporated companies	964,385 00
*On railroad property	4,502,194 00
Total increase	$ 6,322,819 00
Net decrease	453,934 00

The total taxes collected for the fiscal year covered by this report, from all sources, aggregate $1,395,899.73.

Of this amount the tax-payers—outside of cities and towns, railroad and stock corporations—in other words, our agricultural classes, paid, all told, something less than five hundred and fifty thousand dollars for all purposes levied by the State. The remainder was paid on town property by corporations and stock companies, and in special and privilege taxes.

The expenditures will show that of this sum so collected over seven hundred and seventy-five thousand dollars were expended for the public or common schools and for State schools for which appropriations are made, and over ninety-nine thousand dollars for the support of soldiers and the widows of soldiers of the late war between the States.

While the value of property, as appraised for taxation, has largely decreased in the rural districts—the compensating increase occurring elsewhere as noted—the rate of direct taxation on property for general purposes has decreased, until now our people actually pay the lowest rate on the

*The fiscal year in which railroad property is assessed ends June 30th. The assessment on such property for the year ending June 30, 1893, is therefore computed with the assessment of all other property for the tax year 1892, the year covered by this report.

lowest valuation levied and assessed upon the people of any State of the Union of similar characteristics and resources, as I learn by comparison. And the expense of the administration of the Executive and Judicial Departments of the State is so economical that the fees and special privilege taxes collected in the Executive Department, creating a fund not at all connected with direct taxation, are very nearly enough to pay it. I make this statement, in connection with others, to show that, since 1870, a constant and successful endeavor has been made by those entrusted with the control of affairs not only to reduce the burden of taxation on the people, to lessen the expenses of administration, but to place the burden where it is least felt and can best be borne, and apply the moneys collected where they will do the most good for the masses, and objects of charity. Thus, in 1868, 1869 and 1870, when taxes for public or common schools, to the amount of more than three hundred and fifty thousand dollars, were collected on a very high levy, and less than forty thousand dollars were actually spent for the education of the children of the State, the Legislatures, since 1870, have consistently reduced the rate of direct taxation and so appropriated the moneys collected until this year, covered by this report, nearly eight hundred thousand dollars have been expended directly for the education of the children, of both races of the State, a record in both directions which I am sure the people will commend.

I invite attention to statement No. 9, it being a comparative statement of the value of real estate in this State as returned by the owners thereof to the United States census-takers in 1890, and the value of the same property as appraised for taxation in 1891. The discrepancy is astounding, and can only be accounted for on the ground that the census table shows the value of the realty as the owners thereof believed it to be, while the other the value

placed upon it by appraisers for the purposes of taxation, following an unwritten law to appraise property at only two-thirds of what they think its real value to be. In this instance it is appraised at only about one-half of what the owners thought it worth. And notwithstanding this correspondingly low appraisement, as suggested elsewhere, the rate of direct taxation for general purposes is lower than that imposed upon the people of any other purely agricultural State.

There is no doubt that agricultural lands have decreased in value in the last few years. This decrease, and the increase in values and other attractions in cities and towns, account largely for the seemingly growing preference for town life and pursuits over country life and pursuits on the part of our young men. There is unquestionably a cause for this higher and more far-reaching than merely the tastes of individuals; and this cause, as I think this report will show, cannot be connected in any degree with the legislation or the administration of the laws of this State. Had the same earnest endeavor been made in national legislation to justly distribute as well as lessen the burdens of government, no interest of our common country would be suffering to-day, and agriculture, instead of being a vocation to be avoided, would go hand in hand with all other pursuits in attracting the best energies and contributing to the happiness and prosperity of the people. It is to be hoped that the statesmanship may soon develop that will save the people their homes, and encourage them in loving and improving them, for

> "Ill fares the land, to hastening ills a prey,
> Where wealth accumulates, and men decay."

Your Excellency is to be congratulated that during the first year of your administration the last cause of contention over the liabilities of certain subjects of taxation has ceased to exist, and upon agreement between the State and

the parties heretofore involved in the contention all properties in the State will hereafter bear their just portion of taxation. This not only ends most unpleasant controversies, but adds materially to the revenues of the State and cities, towns and counties. As all have shared alike the benefits of good government, and all must now share alike its burdens, it is to be hoped that all the people will be united in future in upbuilding every section and developing every interest of our good old State—a State abundantly blessed with resources and possibilities which, if properly wrought, will constitute the sum total of a people's contentment and prosperity.

In concluding this, my first annual report, permit me to thank, most sincerely, your Excellency and all other officers of the Departments for the uniformly generous aid and kindness which I have received.

With assurances of my highest respect,

I have the honor to be,

Your Excellency's obedient servant,

ROBT. M. FURMAN,

Auditor.

ANNUAL REPORT

OF THE

STATE AUDITOR

FOR THE

FISCAL YEAR ENDING NOVEMBER 30, 1894.

STATE OF NORTH CAROLINA,

AUDITOR'S DEPARTMENT,

RALEIGH, January 1, 1895.

To His Excellency, ELIAS CARR,
Governor of North Carolina,

SIR:—I have the honor to submit herewith the annual report of this Department for the fiscal year ending November 30, 1894.

I respectfully invite attention to the statements and tables contained herein. The matter of taxation is one which greatly interests and concerns the people, and the several subjects upon which taxes are levied or may be levied should enlist the careful attention of the Legislature.

In this latter connection the equalization of taxation is most important. That tax levies are now equally distributed, according to real values, is notoriously untrue. A careful study of the statements and tables in this report will convince all of this fact. It is the duty of every citizen and all property to bear his and its full share of the burdens—if they be so called—of government, but no

more. That these should be equally distributed all will admit, and that method which most nearly attains this end will serve the State and people best.

To this end I respectfully suggest the establishment of a State Board of Equalization, with supervisory and conclusive powers over subordinate boards to be established in each senatorial district—the most convenient subdivisions of the State and more likely to be similar in characteristics. The sub-boards should be composed of the Chairmen of the Boards of Commissioners of the respective counties composing their senatorial district, to whom the assessments of the respective counties shall be submitted, the work of this sub-board in turn to be carefully supervised by the State Board for the State at large. Nor need these boards be expensive. The county chairmen should be paid the same *per diem* now paid by their respective counties, with mileage to and from the place of meeting: while the members of the State Board—not less than five in number, representing the sections of the State—should receive from the State the same mileage and *per diem* now allowed members of the General Assembly. By this or some similar method, with the selection of men for these important positions which the great interests involved would require, I verily believe the people would be rendered a great service and justice more nearly meted out to all.

The continued increase in values in our towns and cities and corporate interests is a source of gratification to all who love the State and wish its citizens prosperity. But, unfortunately, these improvements, since my last report, like those therein referred to, are confined to the towns and cities and corporate properties. Other properties do not show, according to this report, that condition of prosperity which the welfare of the people, as a whole, requires. Of course I refer more particularly to those interests outside

of towns and cities and corporations, represented by our agricultural classes. That a better day is dawning upon this class is earnestly hoped and believed. They were blessed the past season with abundant crops; they are less in debt than at any time for many years. Such things as they have to buy are much cheaper than heretofore; peace, plenty and low taxation abound within the borders of our State, and another year of such economy and endeavor on their part, with equal conditions with the last, must greatly enhance their prosperity and place them once again abreast of others in our State in the achievements of material success.

PROPERTY VALUES AND TAXATION.

It is agreeable to note that, notwithstanding the very severe panic of 1893, the aggregate valuation of all properties subject to taxation shows a net increase over the previous year, 1892, of $1,209,392.15.

The total increase for the year was $2,628,629.07, distributed as follows:

On town lots (number, 888)	$1,764,389 00
On mules (number, 3,370)	24,279 00
On asses (number, 83)	2,109 00
On hogs (number, 17,513)	121,680 00
On all other personal property	306,326 00
On railroad property	394,153 15
On telegraph lines	15,692 92
Total increase	$2,628,629 07

There was a decrease in the values of the following subjects and in numbers of acres of land and sheep and cattle:

On lands outside cities and towns (839,018 acres)	$104,138 00
On horses	2,648 00
On goats	57 00
On cattle (10,038)	98,676 00
On sheep (4,482)	10,888 00
On farming utensils, etc.	199,848 00
On money on hand or deposit	20,415 00

On solvent credits	158,465 00
On stock in incorporated companies	755,903 00
On Pullman cars	14,658 92
On steamboats and canals	53,540 00
Total decrease	$1,419,236 92

Leaving the net increase $1,209,392.15.

In 1892, under the act of the General Assembly of 1891, the rate of taxation for the several purposes for which the State levies taxes was—

For general purposes	25 cents on each $100 of property.
For pensions	3 cents on each $100 of property.
For schools	15 cents on each $100 of property.

In 1893, under the act of the General Assembly of that year, the rate was—

For general purposes	22 cents on each $100 of property.
For pensions	3⅓ cents on each $100 of property.
For schools	16 cents on each $100 of property.

Making a net reduction in 1893 as compared with 1892 of one and two-thirds cents on each $100 of property.

In 1892 there was collected in taxes—

For general purposes	$ 661,409 03
For schools	734,490 70
Total	$1,395,899 73

In 1893 there was collected—

For general purposes	$ 586,905 35
For schools	772,089 40
Total	$1,358,994 75

Showing a difference of $36,904.98 less collected in 1893 than in 1892. The reduction in the tax levy of 3 cents—from 25 to 22 cents—accounts for the less sum collected for general purposes, notwithstanding the aggregate increase in values, elsewhere noted; and the increase of .01 cent for

schools accounts for the increase in the amount collected for that purpose.

The State and county taxation for 1893 for all purposes was—State, $1,358,994.75; county, $1,058,941.69; total, $2,417,935.44.* Estimating the population of the State for that year to be 1,675,000, the *per capita* tax was $1.44. This includes State taxes for all purposes, interest, State government, pensions and schools; and county taxes, special and general, for all purposes.

There was an increase of county taxes for general county purposes in 1893 over 1892 of $152,561.77; a decrease for special county purposes of $39,951.10.

There was a noticeable increase in incomes and profits, though it still cuts a lamentable figure in the returns. In 1892 there was listed $162,466 "net incomes and profits"; in 1893, $671,929 "gross incomes and profits," the Revenue Act of 1893 having changed the method of taxation from "net" to "gross" on "property not already taxed by the laws of this State, with a statement of the source or sources from which it was derived"; also "income over one thousand dollars derived from salaries or fees or both." The $671,929 represents the "gross income and profits" derived from "property not already taxed" and salaries and fees above $1,000.

The (purchase) tax on "merchants and other dealers" amounted, in 1892, to $28,959.51; in 1893 to $23,847.62, a decrease of $5,111.89 for the year.

There was an increase in the taxes—

On general property paid by whites of	$ 24,036 67
On general property paid by colored of	795 73
An increase in white poll tax of	3,078 98
A decrease in colored poll tax of	731 26

*The taxes for pensions are incorporated in the above, being on property and poll.

COMPARATIVE AVERAGE VALUATIONS.

I submit the following comparative statement of the average valuation of land per acre and stock per head for the years 1891, 1892 and 1893, as returned for taxation:

	1893.	1892.	1891.
Land, per acre	$ 4 16	$ 4 02	$ 4 22
Horses, per head	51 09	52 38	54 59
Mules, per head	58 09	59 67	61 18
Asses, per head	51 78	54 41	59 97
Goats, per head	76	77	71
Cattle, per head	7 85	7 79	8 00
Hogs, per head	1 40	1 34	1 31
Sheep, per head	1 00	1 01	1 02

AVERAGE VALUATION OF LAND PER ACRE IN EACH COUNTY.

Table No. 10 will show the average value per acre of land outside of cities and towns in each county in the State.

As noted elsewhere in this report the average per acre for the entire State is $4.16. The average valuation per head of stock is also noted elsewhere.

These tables suggest much that must be gratifying, going to show, as they do, the great economy in valuation and taxation exercised during the past two decades by those entrusted with the administration of State and county affairs.

According to the census of 1890 the average number of acres to the farm in this State, including improved and unimproved lands, is 127. At the assessed value per acre for taxation, $4.16, the average farm in the State pays taxes on $528.32 value. The State levy for all purposes—general, pensions and schools—41⅓ cents on each $100 of property, costs the owner of this farm two dollars and eighteen cents ($2.18) all told. A two-hundred-and-fifty-acre farm pays, at present valuation and levy, $4.29 in taxes for all State purposes.

The great reduction in our State indebtedness, as well as that of counties (and a majority of the latter owe no debt at all, county or town), the very low valuation as herein shown, and the tax levy by the State as comparatively low, is monumental testimony to the honest and earnest endeavor of those entrusted with the administration of State and county affairs the past twenty years in behalf of the people and tax-payers. Whatever burdens may exist none of them can truthfully be charged to the taxation or valuations of property in this State.

FLUCTUATIONS IN ACREAGE.

There is an astonishing fluctuation in the acreage of the State as returned for taxation. There were in the State, as listed, in

1891	27,374,295 acres of land.
1892	28,236,453 acres of land.
1893	27,397,435 acres of land.

A decrease in 1893 from 1892 of 839,018 acres. How to account for this I confess my inability. In 1892 the average value per acre was $4.02; in 1893 the average value, as assessed for taxation, was $4.16. At $4.16 per acre the loss to the State and counties in 1893 in taxable values was $34,903.14.

There is no evidence in this Department showing that these lands have been purchased either by the State or counties for failure of owners to pay taxes thereon. In the returns made to this Department of "unlisted taxables" is a statement of "allowances" made by the Boards of Commissioners for "overcharges, errors, insolvents, etc.," in which hundreds and in many cases thousands of acres of land appear; but unless there was "error"* in the tabula-

*If the decrease be chargeable to errors in tabulation it should be so specifically stated.

tions of the returns of the list-takers I am at a loss to understand how these allowances can enter as an element of consideration as to the disappearance of over 800,000 acres of land in one year, and involving a loss of taxable property of over $34,000. "Insolvents" cannot be charged with their disappearance certainly, and "overcharges" will most assuredly repudiate any such imputation. I respectfully submit this for consideration. The General Assembly soon to assemble, composed, as it will be, of patriotic and tax-paying citizens, will, I am sure, take such steps as may be necessary to stop this curtailment of the State's territory, and revenues which go to support our State government, schools, charitable institutions, orphan children, disabled soldiers and the widows of those brave men who, at the call of their State, died in defense of that which they believed to be right, and, so dying, vindicated the integrity of their own convictions and the sacredness of the "cause for which they fell."

PENSIONS.

There have been issued on account of pensions for the year 1894, under the several laws providing for such, warrants as follows:

Under sections 3477–3478 of The Code, 38 in number, $120 each		$ 4,560 00
Under Act of 1889, as amended by Acts of 1891 and 1893, to first class, 68 in number, $68 each		4,624 00
To second class, 240 in number, $51 each		12,240 00
To third class, 348 in number, $34 each		11,832 00
To fourth class, widows, 2,737 in number, $17 each		46,529 00
To fourth class, soldiers, 1,491 in number, $17 each		25,347 00
Total for pensions		$105,132 00
Amount issued in 1893	$99,280 00	
Increase in 1894 over 1893	5,818 00	

There were on the pension roll January 1, 1894, 4,886 pensioners. There was an increase during the year of 131,

confined to soldiers of the fourth class. There was a decrease in other classes as follows:

In second class	12
In third class	16
In fourth class, widows	67
Total decrease	95
Net increase for the year	36

The amount paid to the soldiers under sections 3477 and 3478 of The Code comes from the general fund of the State, leaving the net amount distributed under the Act of 1889 and amendments thereto $100,572.

The present levy of $3\frac{1}{3}$ cents on $100 worth of property and 10 cents on each poll will produce for the present current year:

On property	$ 88,642 37
On the poll	22,748 40
Total pension fund for 1895	$111,390 77

A tax of $4\frac{1}{2}$ cents on the $100 worth of property, at the present assessed valuation, and $13\frac{1}{2}$ cents on each poll will raise funds enough to pay the soldiers and widows of soldiers the full quota allowed by law, to-wit:

First class	$100 each per annum.
Second class	75 each per annum.
Third class	50 each per annum.
Fourth class, soldiers	25 each per annum.
Fourth class, widows	25 each per annum.

When we remember this class of our citizens are rapidly advancing to the age of helplessness, and with increasing age and the infirmities incident thereto are becoming the greater burdens upon themselves and those upon whom they must more or less depend, it does seem to me the people of our State could and would gladly bear a tax so moderate as the above for so worthy an object, one which

appeals so strongly to every sensibility of grateful remembrance of heroic services, of which they are to-day but living monuments. It must be remembered that no one can be a beneficiary of the pension law who owns five hundred dollars' worth of property or holds a position under either State or National government which pays three hundred dollars in fees or salary per annum. Therefore only those who are comparatively or altogether dependent financially, coupled with their physical infirmities incident to wounds or age or both, can receive any of this pension fund. They cannot be with us long. Let the people contribute this mite of their abundance to help smooth their pathway as they journey along toward the sunset of life. I believe they will cheerfully do it if given the opportunity, and I submit this suggestion to your Excellency, knowing your deep sympathy for your fellow-soldiers, and knowing, also, that anything in the power of the State to do to render their last days days of pleasantness and peace will be gladly sanctioned by you.

In connection with this subject I respectfully suggest that the widows of those soldiers who have been on the pension roll be placed on the list and awarded the amount allowed to widows under the law. This will not increase the disbursements, but, in case the husband received a first, second or third class apportionment, would decrease them to that of the fourth class, all widows being of this class. At most they will only receive that which the husband would have continued to receive had he lived. These good women are more helpless, if anything, than the men, and all have to be practically dependent to receive any benefit of this distribution. Besides, they seem to be passing away more rapidly than the men, for out of 17 deaths of pensioners in 1893, 14 were widows, and out of 95 deaths in 1894, 67 were widows. Could the people see these unfortunate but

most worthy people as I have seen them in this office, see their disappointment when told the law allowed no pension to them unless their husbands died on or before April 9, 1866, and hear their "tales of woe," there would be, I feel sure, a universal demand that they be allowed to receive the pittance allowed to widows of heroic husbands.

BUILDING AND LOAN ASSOCIATIONS.

There was an increase of ten (10) companies authorized to do business in this State during the year, making fifty now authorized. Of this number it is gratifying to state that twenty-five, or one-half, are home companies. All these companies, so far as this Department has been able to ascertain, are reliable and observe the requirements of the law. The fact that there was an increase in the number of companies in the year following so quickly, and to a large degree participating in the effects of such depression as was universal during 1893, indicates that the value of such institutions, when properly conducted, is being appreciated in the State. That much good has been done by way of encouraging the saving of money by wage-earners or people of small incomes, and by such method of saving enabling them to become owners of their own homes, is evidenced in every section where such institutions exist, and in many localities where they do not, but which receive the benefits of such associations. And could it be shown that a borrower of one of these associations, at the end of the period required for payment, will have paid a per cent. higher interest than that contemplated by our law regulating the rate of interest, I am sure the money thus borrowed will be cheaper and the interest thus paid will be less than it costs as obtained ordinarily through brokers or money commission dealers, who seem to be the principal agencies now in vogue through which loans are obtained.

Banks, whether National, State or Savings, cannot, for obvious reasons, loan money on such terms as granted by building and loan associations. Individuals who have money to lend will not lend it on such terms of payment. The class of people who patronize or borrow from building and loan associations really have access to no other institutions or agencies. Payments are in small monthly installments, and usually the amount per month on the sum borrowed to secure a home is less than the rent paid for a less comfortable home, and each monthly payment goes to liquidate the debt due the association. Every dollar thus invested adds to the taxable values of the State and increases the interest of the home-owner in the welfare and good management of the government. Such institutions should be encouraged by just but strict laws and regulations.

THE PUBLIC INDEBTEDNESS OF THE STATE, CITIES AND TOWNS, COUNTIES AND TOWNSHIPS.

The ability of a people to pay such taxes as may be required for the maintenance of the government honestly and economically administered very largely depends upon what they own and what they owe. As a matter of important information touching upon this point I desired to incorporate in this report the total public debt of the State, with that of the cities and towns, counties and townships, and, contrasting this indebtedness with what the people own, would, I felt justified in believing, present a condition of affairs which could not be otherwise than gratifying; that it would also show that the expenditures of the people's money had been so carefully guarded and their affairs so faithfully and economically administered that the people could not only well be congratulated, but could as well congratulate themselves.

With this end in view I addressed two several letters to the authorities of each county asking for the necessary information concerning municipal indebtedness. I regret to state to your Excellency that the authorities of quite a number of the counties failed to respond to my request. I think it but due those who did reply to give their respective communities the benefit thereof, as they afford an ample index to the condition of affairs of the several counties of the entire State. Table No. 9 is thus given, showing the indebtedness of the counties, townships, cities and towns, as well as of municipalities which owe no debt, so far as reported. It will be seen that nearly one-half of the counties reporting report no county, township, city or town indebtedness. I have no doubt, from the general information I have of the several counties not reporting, that a much larger per cent. owe no debt at all, county, town, township or city, and to this may be attributed the failure of their respective authorities to reply to my inquiry.

This municipal indebtedness, so far as counties, cities and towns are concerned, is for substantial permanent improvements, such as court-houses, jails, improved jail cells, homes for the aged and infirm, iron bridges replacing old wooden structures, permanent road-making, etc., in the counties, and water-works, electric light and gas plants, sewer systems and permanent street improvements in the cities and towns. The township indebtedness is very largely, almost wholly, by reason of railroad subscriptions submitted to and voted by a popular vote of the people. The bonded indebtedness of the several cities and towns was likewise submitted to and voted by a majority of all the voters of each municipality.

The debt of the State outstanding at this date, according to the statement of the State Treasurer, for which taxes are levied to pay interest, amounts to $3,322,800, repre-

sented by 4 per cent. bonds; and, taking the counties, cities, towns and townships reporting as an index of the whole, and from general information I know it to be just to do so, I feel perfectly safe in venturing the statement that the aggregate public indebtedness of the people, the principal of which or the interest on which taxes are collected to pay, will not exceed one-twenty-fifth of the aggregate value of the tax-paying property of the State as stated in this report, to-wit, $262,927,119.87; in other words, the people of North Carolina actually own twenty-five times more than their public indebtedness amounts to. Considering what onerous burdens, by way of debt, rested upon every county and city, and the State as well, but a few years ago, and considering the condition of affairs to-day, the people—tax-payers—may well thank those who have so faithfully and ably administered their affairs. Reduced or full payment of debts and an increase in valuations of property mean greater ability on the part of the people to meet the moderate demands now made, municipal and State, for the maintenance of their government.

I desire here to thank those gentlemen who so kindly responded to my request for the information contained herein; also to express my regrets to those who failed to do so, from whatever cause.

All the property of the State now responds to the call of the tax-gatherer save that of the North Carolina Railroad Company. Your Excellency is familiar with the difficulties surrounding this matter.

It is my pleasure to repeat the statement made in my last report to your Excellency, that the State of North Carolina levies and collects for general purposes a lower rate of taxes than any State of the Union comparing in characteristics with this State, and all expenses have been kept strictly within the appropriations and the moneys provided for the maintenance of the government.

I desire here to acknowledge my indebtedness to Mr. T. P. Jerman, Jr., Chief Clerk, and Mr. J. J. Dunn, Pension Clerk of this Department, for their very efficient and faithful services.

I have the honor to be,

Your Excellency's obedient servant,

ROBT. M. FURMAN,

Auditor of State.
